Cute idea and seems well madeBy AmaristellaI bought this calendar to put on my husband's desk to give him a little something to look at each day and to feel like he's following along without forcing all my lengthy books and websites on him.I like that:It's well made, stands up on built in stand, paper

is a good quality It has special stickers with landmarks at the back It has lines on each page to add your own notes It goes all the way to 41 weeks, 6 days for those late bloomers I don't like that: It seems to get ahead of itself. Measurement estimates for the first half of pregnancy vary pretty significantly from all other resources (including several doctor's offices). I solve this problem by crossing out measurements and entering them from other resources or from my own medical data. Overall great product and I would recommend it to others. 1 of 1 people found the following review helpful. Perfect for 1st Time Parents! By S. Kirsten I love this calendar for a couple reasons: (1) It's a good way to keep track of what week you're in and how many days you have left until your due date (2) Most of the daily entries are helpful (particularly the weight/length/growth ones). There are a few entries that are completely useless (particularly near the end when baby has all its essential organs and is just growing) but it's still a nice reminder that baby is coming soon (3) It's a way for my husband to feel involved. We read the entries together and it helps him get an idea of what is going on with baby. I definitely recommend that you go through the calendar as soon as you get it and write the dates on each page, since we sometimes skip a day or two and need to read multiple at one time. A couple friends have gotten this for the grandparents-to-be and recommend this as a great gift so that the grandparents also feel involved in the process. 2 of 2 people found the following review helpful. Must Buy!!! By OldsRocket Countdown to My Birth is a very exciting way to keep up with the development of your child. There are all kinds of interesting phases that take place throughout the pregnancy and this calendar was a fun way for my wife and I to wake up each morning and "connect" with our child. We never read ahead and just looked forward to each new day when we could flip the date and see what our baby was going to "say." There is also a place to take "notes" on events that occurred each day as well as stickers with major marking points in the pregnancy (Hurray! You know I'm here, You hear my heartbeat, You see me in an ultrasound, etc.) I think what I really like about this is that it makes me (the father) feel more involved in the pregnancy and keeps me really excited to see my first child. I also think this will be a wonderful gift for my son when he is older so he can read what his mother and I were thinking/feeling during each stage of the pregnancy. I would buy it again.

This day by day account of pregnancy will help expecting mothers discover captivating facts like when your baby is the length and weight of a hot dog roll, when the heart begins to beat, when their eyes open and they begin to look around, and 277 additional daily developmental facts beginning with "making me" and concluding with the "arrival." This book will warm a mom's heart and soul. It's the making of a miracle and a keepsake forever Jodie Lynn, syndicated family columnist for Parent to Parent. There's room for mom to make notes about each day. A fun way to keep track of the changes in your developing baby and get ready for the even bigger changes ahead. Rachel Bye, MD, pediatrician : This book will warm a mom's heart and soul. It's the making of a miracle and a keepsake forever Jodie Lynn, syndicated family columnist for Parent to Parent.

About the Author When Julie B. Carr was pregnant, her mother asked her, "What's happening to your baby today?" Challenged, Julie did extensive research to answer that question and came up with a unique countdown guide/journal. Julie lives with her husband and two children in Oregon.
