**Jrgen Fuchs : Environmental Stressors in Health and Disease (Oxidative Stress and Disease)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Environmental Stressors in Health and Disease (Oxidative Stress and Disease):

This volume illustrates the impact of environmental oxidants on the tissues of the eyes, lungs and skin, as well as on the immune system - highlighting common illnesses, injuries and pathologies induced by pro-oxidant environmental xenobiotics such as inflammation, immune response, signal transduction, regulation of gene expression, and carcinogenesis. It provides clinical presentations and discusses the effects of environmental oxidants on target organs.
