Michael J. Timmons, Ralph T. Hutchings : Human Anatomy: Laboratory Guide and Dissection Manual, 4th Edition before purchasing it in order to gage whether or not it would be worth my time, and all praised Human Anatomy: Laboratory Guide and Dissection Manual, 4th Edition:

0 of 0 people found the following review helpful. Five StarsBy CustomerExcellent book in excellent new condition. The book is very helpful for my class. Thank you very much.0 of 0 people found the following review helpful. Five StarsBy AmyGreat for my college course. Good graphics and very helpful1 of 1 people found the following review helpful. One StarBy StephanieThis book was torn and extremely highlighted. For the price, this book was a rip off.

This manual combines the features of a traditional anatomy laboratory manual with those of a dissection manual and

an anatomical atlas. Superb photos and illustrations are supplemented with observation instructions for a wide variety of specimens including cats, cadavers, isolated organs, histology slides and models. Exercises include review questions, labeling, coloring, and drawing. A 132 color plate folio of labeled cadaver specimen and anatomical model photos is a distinguishing feature of this laboratory guide. While the manual provides references to the Martini/Timmons/Tallitsch, Human Anatomy Fourth Edition textbook, it can be used with any anatomy textbook.

From the Publisher This manual contains optional cross-references to Human Anatomy and features specimen photos and descriptions for cat, cadaver, and laboratory models.
