**Elaine N. Marieb, Katja N. Hoehn : Human Anatomy Physiology with Brief Atlas and InterActive Physiology 10-System Suite CD-ROM (9th Edition)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Human Anatomy Physiology with Brief Atlas and InterActive Physiology 10-System Suite CD-ROM (9th Edition):

3 of 3 people found the following review helpful. Makes Learning Material Really Easy to UnderstandBy Sammy SchwartzThe material itself goes in a little more detail than I need for my freshman year nursing class but the book makes it really easy to pick out the parts that are helpful for my class so I never have to read about stuff that isnt relevant to me. However because of the interesting wording of the book and many informative pictures, I find myself reading way more than my class covers anyway :)I would highly recommend this book to anyone who has any interest

in anatomy and physiology because this information is laid out in such an easy to understand and very interesting way. It was definitely worth the money to buy and will probably be one of those books that I don't sell back after my class is over. 2 of 2 people found the following review helpful. I love this book! By CLOI had to buy this book for my A P class in nursing school. The way the textbook is written makes it really easy to understand, and I like the way the chapters are laid out. Although I am past A P (and didn't sell back this book! crazy, right?), I frequently refer this textbook when I want to brush up on a topic! 0 of 0 people found the following review helpful. A textbook to hold on to! By Meaghan Clements This textbook is wonderfully written and illustrated. It is a very large and heavy book so keep that in mind for backpack storage. The supporting study tools are excellent supplements although very overpriced. The lab manual that accompanies this is largely just a repeat of the text.

This package contains: 0321506820 / 9780321506825 InterActive Physiology 10-System Suite CD 0321743261 / 9780321743268 Human Anatomy Physiology 080537373X / 9780805373738 Brief Atlas of the Human Body

About the Author For Elaine N. Marieb, taking the student's perspective into account has always been an integral part of her teaching style. Dr. Marieb began her teaching career at Springfield College, where she taught anatomy and physiology to physical education majors. She then joined the faculty of the Biological Science Division of Holyoke Community College in 1969 after receiving her Ph.D. in zoology from the University of Massachusetts at Amherst. While teaching at Holyoke Community College, where many of her students were pursuing nursing degrees, she developed a desire to better understand the relationship between the scientific study of the human body and the clinical aspects of the nursing practice. To that end, while continuing to teach full time, Dr. Marieb pursued her nursing education, which culminated in a Master of Science degree with a clinical specialization in gerontology from the University of Massachusetts. It is this experience, along with stories from the field-including those of former students, now in health careers-that has informed the development of the unique perspective and accessibility for which her texts and laboratory manuals are known. In her ongoing commitment to students and her realization of the challenges they face, Dr. Marieb has given generously to provide opportunities for students to further their education. She contributes to the New Directions, New Careers Program at Holyoke Community College by providing several full-tuition scholarships each year for women returning to college after a hiatus or who are attending college for the first time and would otherwise be unable to continue with their studies without financial support. She funds the E. N. Marieb Science Research Awards at Mount Holyoke College, which promotes research by undergraduate science majors, and generously contributed to the University of Massachusetts at Amherst where she provided funding for reconstruction and instrumentation of a cutting-edge cytology research laboratory that bears her name. In 1994, Dr. Marieb received the Benefactor Award from the National Council for Resource Development, American Association of Community Colleges, which recognizes her ongoing sponsorship of student scholarships, faculty teaching awards, and other academic contributions to Holyoke Community College. In May 2000, the science building at Holyoke Community College was named in her honor. Additionally, while actively engaged as an author, Dr. Marieb serves as a consultant for the Benjamin Cummings "InterActive Physiology" CD-ROM series, and is an active member of the Human Anatomy and Physiology Society (HAPS). "Anatomy Physiology," Second Edition is the latest expression of her commitment to student needs in their pursuit of the study of AP.
