Lauralee Sherwood : Human Physiology: From Cells to Systems (Available Titles CengageNOW) before purchasing it in order to gage whether or not it would be worth my time, and all praised Human Physiology: From Cells to Systems (Available Titles CengageNOW):

0 of 0 people found the following review helpful. Definitely my best companion in the courseBy Emma CThis book explains physiology well in an easy-to-understand manner. When I would get lost in lecture, this book helped clear things up! Definitely my best companion in the course. Illustrations are great, text is concise, and the authors are thorough. Highly recommend.1 of 1 people found the following review helpful. Just because you can write more on a subject doesn't make it better.By Qualitypricethis book over explains concepts a lot. No need for 5 chapters about a simple concept.. Just because you can write more on a subject doesn't make it better.0 of 0 people found the following

review helpful. Physiology Textbook By Babs I bought this book as a required text in a pathophysiology course. Almost every page has a great illustration to demonstrate the concept being taught. Easy to follow for the in-depth level of teaching it provides. Each chapter has practice questions at the end with answers in the back of the book. My favorite feature is the tear-out study cards located at the end of the book-these pages provide a breakdown/summary of the keypoints of each chapter and have really helped with my studying.

HUMAN PHYSIOLOGY, 7th edition focuses on the mechanisms of body function from cells to systems and is organized around the central theme of homeostasis--how the body meets changing demands while maintaining the internal constancy necessary for all cells and organs to function. As an author, Lauralee Sherwood is known for the most up-to-date and accurate coverage as well as strong pedagogy making the text the most effective learning tool. Plus, the program offers a complete complement of media tools for learning and teaching. Additionally, this new edition has an entirely revised art program offering realistic and three-dimensional art as well as new flow diagrams. The new art program helps students visualize difficult concepts and processes for better understanding and mastery of concepts.

About the Author Following graduation from Michigan State University in 1966, Dr. Lauralee Sherwood joined the faculty at West Virginia University, where she is currently a Professor in the Department of Physiology and Pharmacology, School of Medicine. For the past 40 years, Professor Sherwood has taught an average of over 400 students each year in physiology courses for pharmacy, medical technology, physical therapy, occupational therapy, nursing, medical, dental, dental hygiene, nutrition, exercise physiology, and athletic training majors. She has authored three physiology textbooks: HUMAN PHYSIOLOGY: FROM CELLS TO SYSTEMS, FUNDAMENTALS OF HUMAN PHYSIOLOGY, and ANIMAL PHYSIOLOGY: FROM GENES TO ORGANISMS, all published by Cengage Learning/Brooks/Cole. Dr. Sherwood has received numerous teaching awards, including an Amoco Foundation Outstanding Teacher Award, a Golden Key National Honor Society Outstanding Faculty Award, two listings in Who's Who Among America's Teachers, and the Dean's Award of Excellence in Education.
