Angela Hall, Christine Yates : Immunology (Fundamentals of Biomedical Science) before purchasing it in order to gage whether or not it would be worth my time, and all praised Immunology (Fundamentals of Biomedical Science):

Designed to reflect the challenges of practicing biomedical science today, The Fundamentals of Biomedical Science series combines essential basic science with insights into laboratory practice, demonstrating how an understanding of the biology of disease is coupled with the analytical approaches that lead to diagnosis. Assuming only a minimum of prior knowledge, the series reviews the full range of disciplines to which a biomedical scientist may be exposed, from microbiology to cytopathology to transfusion science.A new volume in this exciting series, Immunology offers biomedical science students insights into the function of the immune system, the frontline of defense against

pathological disease, and the diagnostic techniques used to identify associated malfunctions and disorders. By examining the key immunological principles and scientific basis of laboratory techniques--with a focus on the biomedical scientist's role in the diagnostic laboratory--the authors provide students with everyth

"I really like the multi-disciplinary approach to the material. Using case studies really helps to integrate knowledge in an applied context. Students not only get to understand what is happening, but they begin to see why this is important, how this can affect the patient, and what it could mean to them in the diagnostic laboratory." --Glenn Hussey

About the Author
Angela Hall is currently Lead Biomedical Scientist in Immunology for the Imperial College Healthcare NHS Trust, where she runs and teaches the Specialist Diploma in Immunology course, and a member of the Specialist Advisory Panel for Immunology at the Institute of Biomedical Science. Having trained as a Biomedical Scientist in the Immunology Department at the Churchill Hospital Oxford, she made rapid progression to BMS grade 3 gained chartered scientist status in 2008. Christine Yates is Senior Chief Biomedical Scientist in Immunology and Haematology at the Hull Royal Infirmary, a member of the IBMS Specialist Advisory Panel for Immunology, IBMS Chief Examiner for Immunology (2006 to 2009) and has been CPA Assessor for Immunology since 2003.
