**Roopa Kulkarni : Jaypee Gold Standard Mini Atlas Series: Embryology** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Jaypee Gold Standard Mini Atlas Series: Embryology:

This mini atlas is a concise guide to the field of embryology for undergraduate medical students. Divided into four chapters, the book covers basics of human embryology, fetal membranes, development in the third week of life, and developments in the fourth week of life and onwards. This second edition has been fully revised to provide the most up to date information in the field. It is highly illustrated with clinical photographs and figures to enhance learning. Key Points Concise guide to embryology for undergraduate medical students Fully revised, new edition providing latest information in the field Highly illustrated with clinical photographs and figures Previous edition
