From Markus Tolnay : Neuropathology and Genetics of Dementia (Advances in Experimental Medicine and Biology Volume 487) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Neuropathology and Genetics of Dementia (Advances in Experimental Medicine and Biology Volume 487):

This volume is the proceedings from the Swiss Society for Neuropathology XVIIIth International Winter Meeting on

Neuropathology and Genetics of Dementia, held March 23-26, 2000, in St. Moritz, Switzerland. For more than 35 years the Swiss Society of Neuropathology has organised its traditional International Winter Meeting, whose main aim is to bring together neuropathologists and clinicians as well as neuroscientists interested in disease mechanisms. The topic of the 2000 Meeting was Neuropathology and Genetics of Dementia. A programme of invited plenary lectures of high educational value as well as platform and poster presentations given by many participants covered the broad spectrum of dementing disorders. Encouraged by the high standard of the meeting, and probably also influenced by the advent of a new Millennium, it was decided to publish the Proceedings of the 2000 Meeting in the present book.
