Robert Poulin, Serge Morand : Parasite Biodiversity before purchasing it in order to gage whether or not it would be worth my time, and all praised Parasite Biodiversity:

This comprehensive, groundbreaking book on the biodiversity of parasites offers a clear and accessible explanation of how parasite biodiversity provides insight into the history and biogeography of other organisms, the structure of

ecosystems, and the processes that lead to the diversification of life.

About the Author Robert Poulin is arguably the world's leading authority on the ecology and evolution of parasites. He lives in New Zealand. Serge Morand is co-editor with Poulin of *Evolutionary Biology of Host-Parasite Relationships*. He lives in France.
