The International Agency for Research on Cancer : Pathology and Genetics of Skin Tumours (IARC WHO Classification of Tumours) before purchasing it in order to gauge whether or not it would be worth my time, and all praised Pathology and Genetics of Skin Tumours (IARC WHO Classification of Tumours):

1 of 1 people found the following review helpful. Five Stars By miguel armando benavides huerto it's same of the before book 1 of 3 people found the following review helpful. Diagnostic Pathology By Filip Slavchev We need this book in own diagnostic process every day in Medical University- Pleven, Bulgaria. Pathology With a word-excellence

This book provides an authoritative guide to the histological and genetic typing of human tumors of the skin. This volume covers keratinocytic, melanocytic, appendageal, haematopoietic, soft tissue and neural tumors, as well as

inherited tumor syndromes. Each tumor is introduced with a concise definition and discussion of nomenclature, followed by a summary of what is known about its incidence, age and sex distribution, location, clinical signs and symptoms, pathological features, associated genetic alterations, and predictive factors. Distinctive features are further characterized through the inclusion of over 600 color photographs and numerous MRIs, CT scans, and charts showing genetic alterations. The classification uses ICD-O codes from the third edition. This book is in the series commonly referred to as the "Blue Book" series.

Pathology and Genetics of Skin Tumors Contributors: Dr. Iftikhar Ahmed, Dr. Zsolt B. Argenyi, Dr. S. Sankar Banerjee, Dr. Raymond L. Barnhill, Dr. Boris Bastian, Dr. Reuven Bergman, Dr. Maria G. About the Author The International Agency for Research on Cancer (IARC) is part of the World Health Organization. IARC's mission is to coordinate and conduct research on the causes of human cancer, the mechanisms of carcinogenesis, and to develop scientific strategies for cancer control. The Agency is involved in both epidemiological and laboratory research and disseminates scientific information through publications, meetings, courses, and fellowships.
