**Esther Chang RN CM PhD MEdAdmin BAppSc(AdvNur) DNE, John Daly RN BA MEd(Hons) BHSc(N) PhD MACE AFACHSE FCN FRCNA : Pathophysiology Applied to Nursing, 1e** before purchasing it in order to gage whether or not it would be worth my time, and all praised Pathophysiology Applied to Nursing, 1e:

2 of 2 people found the following review helpful. Excellent, really gets to the point.By Eileen ChapallazRelates to nursing in a way few other AP books do. A very valuable resource and a must for all nurses

This valuable resource is designed to provide a foundation for understanding major pathophysiological processes, applied pharmacology, and related nursing implications. It includes a holistic framework for assessing major health

problems, based on fundamental concepts drawn from biological and behavioral sciences. The book's engaging case study approach builds in complexity with each chapter, illustrating applications of pathophysiology and pharmacology to nursing practice. Content has been assembled by academics and expert clinicians with input from physiologists, pharmacists, medical practitioners and other health professionals. Easy-to-follow body system organization explores pathophysiology concepts related to each system. The clinical case study approach featuring realistic scenarios emphasizes application of pathophysiology and pharmacology concepts in nursing practice. Each chapter includes questions and reflective learning exercises to reinforce important concepts. A holistic framework is presented as a method for assessing major health problems. Key aspects of biological and behavioral sciences are integrated into the chapters.

About the Author Esther Chang, RN, CM, Abpp (AdvNsg), DipNEd MEdAdmin PhD FCN (NSW), Professor, School of Nursing, Family and Community Health, University of Western Sydney, NSW, Australia; and John Daly, RN, BA, BHSc (Nurs), MEd (Hons), PhD, FCN (NSW), FRCNA, Professor and Head, School of Nursing, Family and Community Health, University of Western Sydney, NSW, Australia
