Perfect for ReviewBy ScottieI am preparing for my AAPC Certification test and feel this review is concise, easy to read and gets to the meat of what is important. There is a pre-test and a post-test that you do online. Do the pre-test first before you study and see what you have to focus on then study the book and then take the post-test. These are timed to match the 5 hour and 40 minute actual test. See what you learned then take the final in the book. She takes you through the entire CPT sections and has exercises that focus on what is important to remember. Each exercise includes the CPT codes, HCPCS and ICD-9-CM that you have to extract out of an Op report. You give it your best shot and she gives you the answers and the rationale in the back of

the book. I didn't do so well on the pre-test so I am studying now and wow, I think my brain is going to fall out! 0 of 0 people found the following review helpful. 2013 Physician Coding Exam Review by Carol J. Buck By Marty It is horribly impossible to access the resources that the author claims come with this book through the book's online website. If you want to review for your exam without any aggravations and also want answers to any of your exercises, look elsewhere. I also believe this book is obsolete. It is a rehash of the same content and questions as far back as 2004. This is 2014!!! I suggest you consider the latest edition of the "Official CPC Certification Study Guide" by the AAPC who administer the CPC Examination. The end-of-chapter exams in this Study Guide are modeled after the actual certification exam and the answers and rationales to all their questions are included in the Study Guide. 0 of 0 people found the following review helpful. Great way to review! By lace This coding exam review book seems to help prepare students to pass the CPC certification exam. While I'm a bit disappointed w/its online benefits---pretty much only 3 different exams w/150 questions---the pre post online exams have a lot of the same questions. Thank goodness for AAPC's site chapter groups to help w/the process. I just wish there were more ways to test your knowledge w/the book's online section.
