The author team of Prescott's Microbiology continues the tradition of past editions by providing a balanced, comprehensive introduction to all major areas of microbiology. This balance makes Microbiology appropriate for microbiology majors and mixed majors courses. The authors have introduced a number of pedagogical elements designed to facilitate student learning. They also remain focused on readability, artwork, and the integration of several

key themes (including evolution, ecology and diversity) throughout the text, making an already superior text even better.

About the Author Linda M. Sherwood is a member of the Department of Microbiology at the Montana State University. Johanne M. Willey is Full Professor at the Hofstra University in Long Island, New York. Christopher J. Wolverton is Professor of Biological Sciences at Kent State University, Ohio.
