Francisco J. Ayala, Camilo J. Cela-Conde : Processes in Human Evolution: The journey from early hominins to Neanderthals and modern humans before purchasing it in order to gauge whether or not it would be worth my time, and all praised Processes in Human Evolution: The journey from early hominins to Neanderthals and modern humans:

The discoveries of the last decade have brought about a completely revised understanding of human evolution due to the recent advances in genetics, palaeontology, ecology, archaeology, geography, and climate science. Written by two

leading authorities in the fields of physical anthropology and molecular evolution, *Processes in Human Evolution* presents a reconsidered overview of hominid evolution, synthesising data and approaches from a range of interdisciplinary fields. The authors pay particular attention to population migrations - since these are crucial in understanding the origin and dispersion of the different genera and species in each continent - and to the emergence of the lithic cultures and their impact on the evolution of cognitive capacities. *Processes in Human Evolution* is intended as a primary textbook for university courses on human evolution, and may also be used as supplementary reading in advanced undergraduate and graduate courses. It is also suitable for a more general audience seeking a readable but up-to-date and inclusive treatment of human origins and evolution.
